

Construction Management

Mitigating impacts on the day-to-day operation of the Hospital has been at the forefront throughout the planning process.

As part of our planning application, we will be submitting an interim Construction Logistics Plan (CLP) to ensure that any impact associated with the construction of the development are minimised.

Interim Construction Logistics Plan (CLP)

Our Interim Construction Logistics Plan will outline a range of measures intended to prevent disruption to Hospital's day-to-day operation, and neighbouring properties.

Below are some of the issues the Plan will cover:

- Construction Traffic & Parking
- Site Working Hours
- Site Access & Security
- Methods of Construction
- Phasing of Construction Process

This Plan will be submitted as part of our planning application for this site.
